基隆港可接待總噸位達 25 萬噸之大型郵輪；於郵輪航線規劃上，因位處東亞航線樞紐，得以串聯亞洲多元旅遊目的地，向北可連結日本、韓國等東北亞國家，向南則可延伸至香港、菲律賓及越南等東南亞地區。

Cruise Capital of Taiwan

Keelung Port is the most important cruise home port of Taiwan, endowed with excellent natural harbor conditions and a rich historical and cultural heritage, reflecting the distinctive characteristics of port-city interdependence. Located in close proximity to Taiwan's capital, Taipei, the port is supported by a well-developed external transportation network that integrates railways, transit station, and highway systems, enabling efficient access to major tourist destinations in northern Taiwan.

Keelung Port is capable of accommodating large cruise vessels of up to 250,000 gross tons. In terms of cruise route planning, its strategic location as a hub along East Asian shipping routes enables seamless connectivity with a wide range of Asian travel destinations. To the north, cruise routes can be linked to Northeast Asian countries such as Japan and South Korea, while to the south, routes can be extended to Southeast Asian destinations including Hong Kong, the Philippines, and Vietnam.
